

New premium product by Peštan

WALL drain

Premium WALL drain

Technology

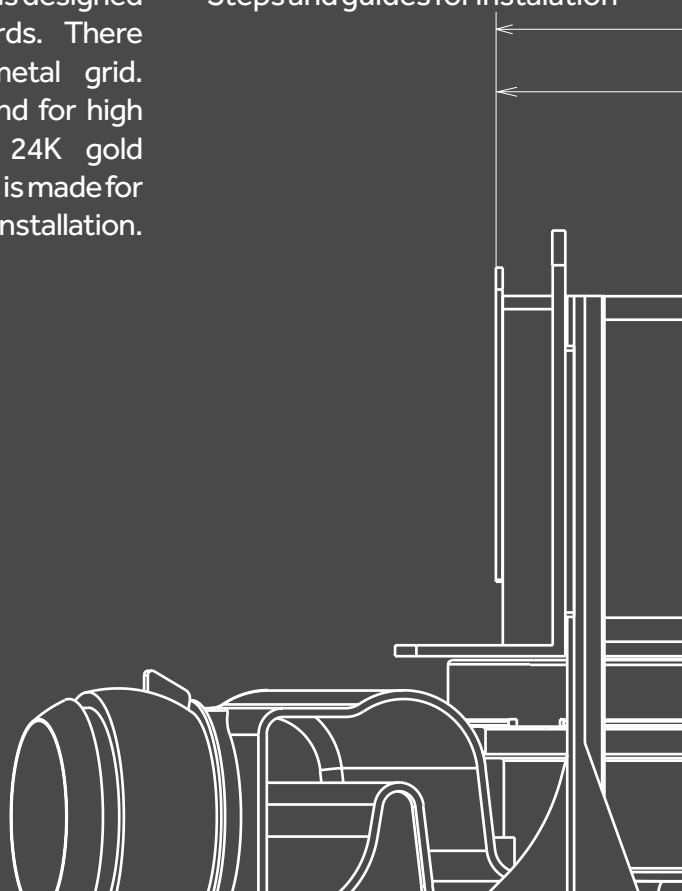

PEŠTAN presents you Confluo brand with its sophisticated solutions that meet the needs of many designers and architects. New CONFLUO drain unites several modern solutions and represents a complete solution for water drainage in the modern bathroom. It is produced with one, two or three inputs and output with adjustable angle. Siphon design is created with high functionality, in order to prevent the entrance of sewer gases, even in cases when the water completely evaporates in the drain.

Design

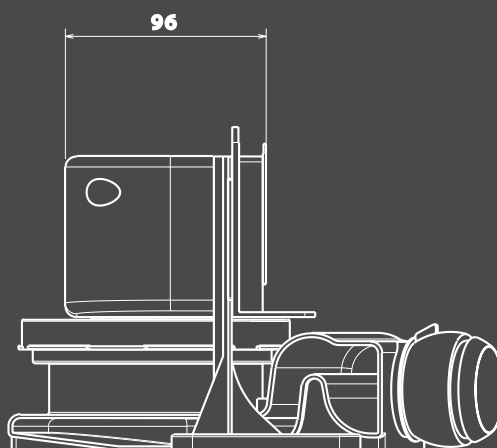

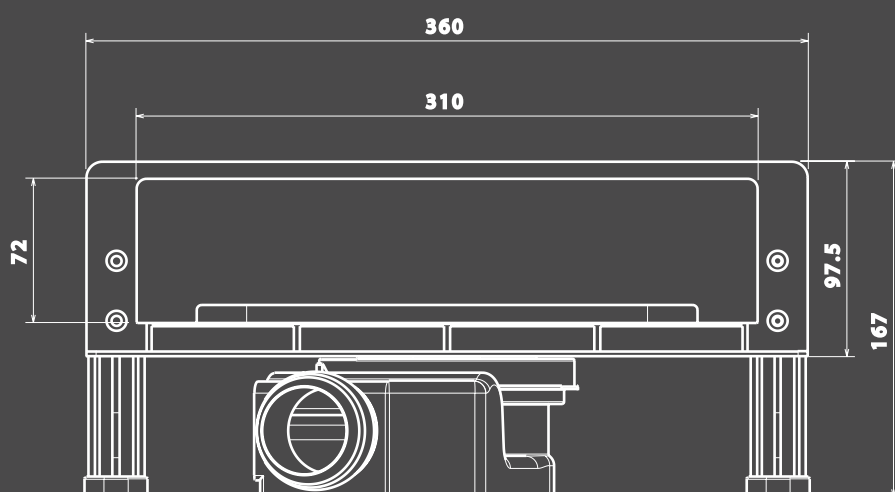

PEŠTAN WALL drain is designed by highest standards. There are two different metal grid. Simple metal grid and for high demanded buyers 24K gold plated grid. The drain is made for easy use and simple installation.

Installation

Steps and guides for installation
